

DISQUE ABRASIF VELCRO - STRUCTURE EN MA

Référence DEA-DTM8684-QZ

EAN13 : 5054905252113

Disque abrasif velcro - structure en maille duree de vie extra longue x4 ø225mm grain 150

The open structure of the grid lines eliminates the need for precise positioning. The hook and loop fastener closure system connects quickly to the sander to hold the sheet in place. Eliminates the need for another backing pad to be used between a regular hook and loop backing on a orbital sander. Silicon carbide grit provides up to 4X longer life compared to DEWALT standard abrasive papers. The open weave structure enables a more effective removal of sanding dust. This results in a finer sanding pattern. Dust can easily be washed off. After drying, the mesh is ready for use again. Works with all dust extraction hole configurations. Suitable for use with all universal random orbit sanders. Garantie 3 ans
